

ANTHEM PAIN MANAGEMENT ECHO

The goal of Project ECHO* is to increase health care capacity by democratizing knowledge and to strengthen the capacity among primary care providers. This will be a series of 60-minute-long teleconference sessions in which providers will have the opportunity to speak with a multidisciplinary team of subject matter experts in the field of Pain Management. These sessions will help primary care providers better understand how to manage their patients with Pain Management while gaining access to subject matter experts, including a board certified specialist in Pain Medicine as well as Physical Medicine and Rehabilitation, a licensed psychologist specializing in chronic pain, and a specialist in mental health and substance use disorder.
