Policy

The Health Plan considers certain services and supplies to be ineligible for separate reimbursement when reported by a professional provider, unless provider, state, or federal contract and/or requirements indicate otherwise. These services and/or supplies may be reported with a primary service or as a stand-alone service.

This policy is divided into 3 sections:

Policy Section 1: Services and Supplies not eligible for separate reimbursement

Section 1 provides a list and description of CPT® and HCPCS Level II codes for those services and supplies not eligible for reimbursement when they are reported with another service or reported as a stand-alone service.

In most cases, services rendered without direct (face-to-face) patient contact are considered to be an integral component of the overall medical management service and are not eligible for separate reimbursement. In addition, modifiers will not override the denial for the always bundled services and/or supplies listed in the embedded document.

Policy Section 2: Procedures, Services and Supplies not eligible for separate reimbursement when reported with another specific procedure, service or supply

Section 2 provides a description and the code pair relationship for procedures that are not eligible for separate reimbursement when performed with another specific service or supply listed in the embedded document. In most cases, modifiers will not override the denial when reported with a specified service or supply.

Policy Section 3: Services not eligible for separate reimbursement when reported with any other procedure, service, or supply

Section 3 provides the code and description for services that are eligible for reimbursement when reported as a stand-alone service but are not eligible or separate reimbursement when performed with any other procedure, service or supply. Modifier
